MEASURING WHEELS KESONITE™ SERIES

MADE OF KESONITE™

There are inherent vulnerabilities of die cast and metal spoked wheels. Everyday use requires that a wheel handle some rough treatment without dents and without bending.

Not all wheels are up to this. Our solution? Invent a new material. Kesonite is a strong, dense metal/resin composite. It holds its shape better than metal and it's stronger than a spoked or die cast wheel. The weight of the wheel makes it easier to use and more accurate on rough terrain.

Based on the design of the RR Series Large, a model with over 20 years of continuous improvement, including wheel design, material, and safety reflector!

Easy-to-read, Magnified Counter 5-digit, easy-read, magnified counter measures 9,999 feet, 11 inches (9,999.9 ft on engineers' model and 9,999.9 meters on metric)

FEATURES < KESONITE™ SERIES

- 1. Pistol Grip Handle** increases control and comfort.
- 2. Quick Snap Cam Locks** to store and transport the wheel with minimal effort.
- 3. Telescopes down to 23 inches** cam locks make the unit simple to operate when preparing for storage or transportation.
- 4. Flip-Down Kickstand** keeps the wheel upright when you need your hands free to perform other tasks and stays out of the way as you measure.
- 5. Safety Reflector**

Limited lifetime warranty.
